Procedure of plant protection
products registration
from the point of view
of assessing unit

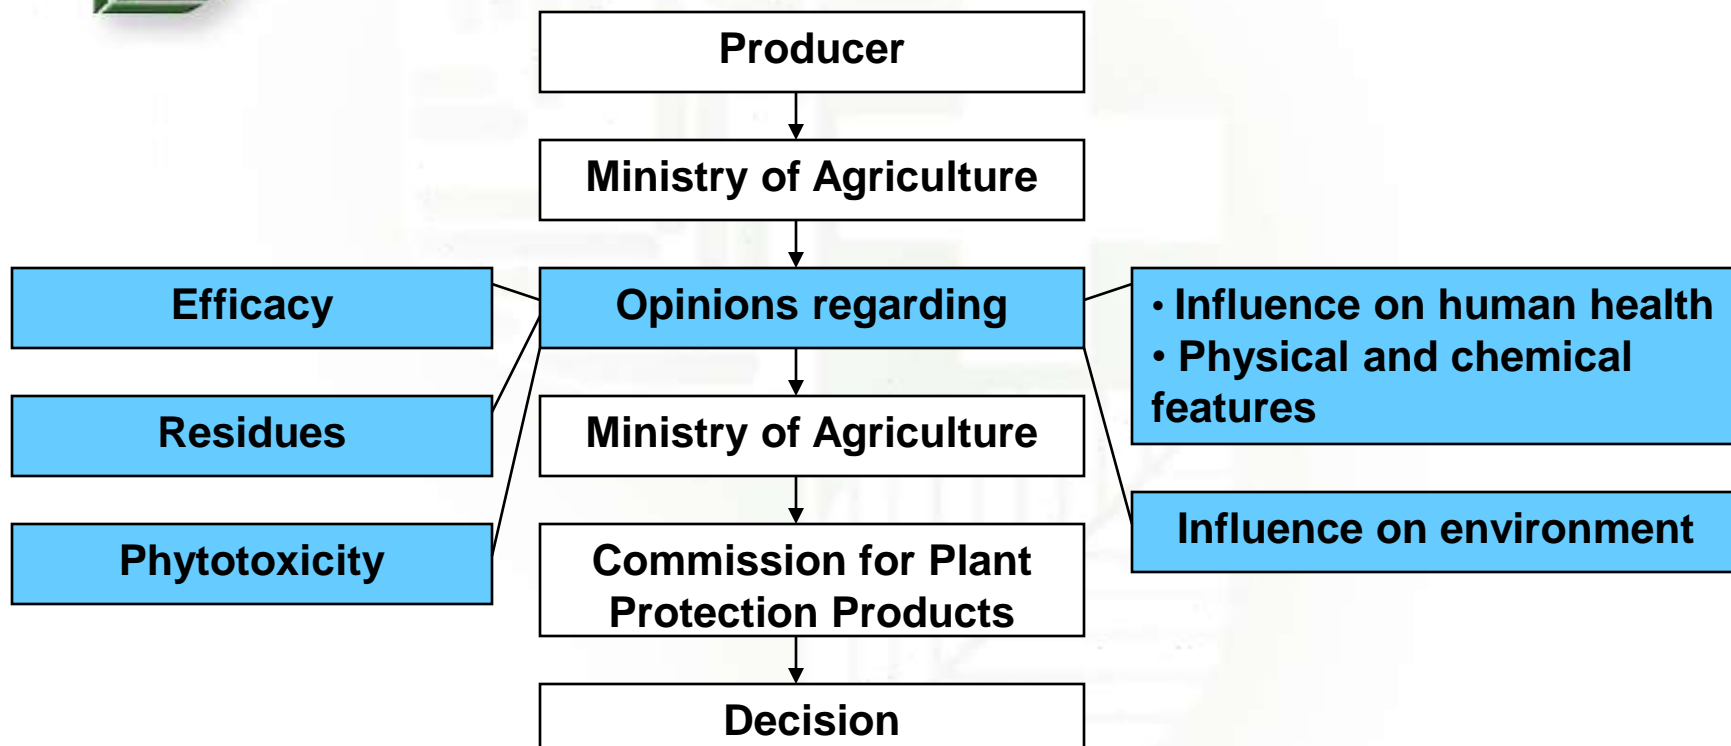

Legal basis of ppp registration in Poland

- Council Directive 91/414/EEC of 15 July 1991 concerning the placing of plant protection products on the market
Official Journal L 230 , 19/08/1991 P. 0001 0032
- Ustawa z 18 grudnia 2003 o ochronie roślin

Registration procedure of PPP in Poland

Units assessing ppp in Poland

Scope of assessment	Responsible units
Physicochemical properties	Institute of Organic Industry, National Institute of Public Health, Institute of Environmental Protection, Bureau for Chemical Substances and Preparations
Influence on the environment	Institute of Environmental Protection
Influence on human and residues	National Institute of Public Health, Bureau for Chemical Substances and Preparations, Plant Protection Institute – National Research Institute
Efficacy	Plant Protection Institute – National Research Institute University of Warmia and Mazury
Effect on vertebrates	National Institute of Public Health Bureau for Chemical Substances and Preparations
Phytotoxicity	Plant Protection Institute – National Research Institute University of Warmia and Mazury

The important issues and challenges

- **Information flow among units**
(results of some assessment can facilitate preparation of the others, but problems with timing)
- **The evaluation dossier** (shape, details, volume, language)
- **The diversity of assessed ppp** (to much specialization not always pays)
- **What in case of not sufficient documentation**
(the simplest way – negative assessment not in the farmers' interest; demanding additional data from producers – HUGE problems with timing)

Thank you for your attention
