Czech Republic Pesticides Active Ingredients and PPPs Legislation

Act on the Plant Health No 326/2004, of the Collection of the Laws of the Czech Republic - in force on 31 May 2004

- Usage data collection mandatory (§ 49, point 3 of the Act)
- Sales data collection mandatory (§ 60, point 1 a) of the Act)
- State Phytosanitary Administration, PPPs Section, Post-registration Control Division, Brno, Czech Republic, is responsible for collecting data

Pesticides Active Ingredients and PPPs Usage Data Collection (1)

- FAO statistics methodology for collecting usage data and pesticide types grouping is used
- Data are collected since 1952 using FAO summary simple form only, since 1964 up to now using form containing larger set of data

Pesticides Active Ingredients and PPPs Usage Data Collection (2)

- Collection of data from farmers on used PPPs for agricultural production once a year – records must be kept by farmers for 5 years for control purposes
- Paper form (obligatory) is just being changed using new 'STATPOR' SW into e-records (voluntary for farmers, accessible by proper governmental control bodies on-line)
- Farms larger than 10 ha (vegetables, fruits, wineyards and ornamentals - farms larger than 5 ha)

Pesticides Active Ingredients and PPPs Usage Data Collection (3)

- Both PPPs and active ingredients data are collected
- Data on the active ingredients are not provided but are available - based on the data on volume of formulated products active ingredients data are then calculated on the basis of their content in the PPPs

Pesticides Active Ingredients and PPPs Usage Data Collection (4)

Pesticides usage data are in general collected by

- Volume (including batch No)
- Aggregated by chemical groups
- Subdivided by different uses
(e.g.agriculture,horticulture, forestry, gardening)
- Subdivided by geographic regions
- Aggregated by crops and crop groups
(e.g. cereals, vegetables, orchards etc.)

Pesticides Active Ingredients and PPPs Usage Data Collection (5)

- All data accessible for Czech bodies and on request for EU MSs bodies and the European Commission
- For general public are accessible only the summarized data on the active ingredients volume for treatment of crop groups (not on the volume of certain PPPs – business confidential data!). Data are available for everybody in e-form on the State Phytosanitary Administration web site:

www.srs.cz

Pesticides Active Ingredients and PPPs Sales Data Collection (1)

- Pesticide sales data are collected since the 2nd half of 2004 (as a new EU MS)
- PPPs sales data are collected only (pesticides active ingredients sales data are not collected)
- Pesticide sales data collected nationwide

Pesticides Active Ingredients and PPPs Sales Data Collection (2)

- Collected from pesticides manufacturers, PPPs registration (authorisation) holders or their authorised representatives when selling the PPPs for placing on the market themselves, wholesalers and retailers
- Data are collected using written form once a quarter (every three months)

Pesticides Active Ingredients and PPPs Sales Data Collection (3)

- Pesticides sales data are in general collected by volume (including batch No)
- Records on PPPs sales data are kept as business confidential data and thus are not published
- All data on PPPs sales are accessible for Czech bodies and on request for EU MSs bodies and the European Commission

Thank you for your attention!
