# Drones in plant protection- what is needed?

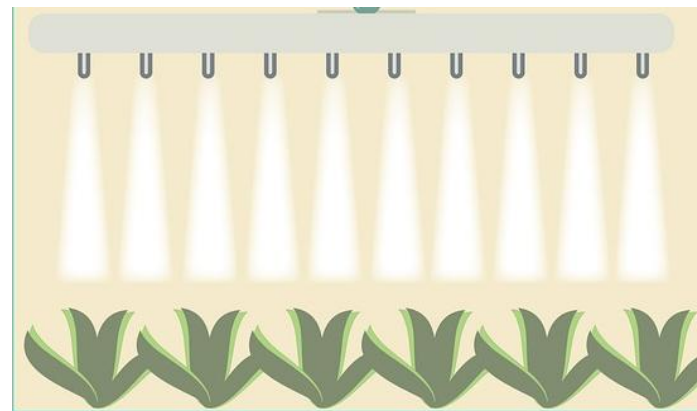

## *Drones (RPAS)*

**Act No 46./2008**

*„Plant protection equipments  
**with tank > 5dm<sup>3</sup>** need to be  
type-qualified before placing  
on the market...”*

- Operates correctly
- Consistent dispersion
- No unacceptable environmental effect

Currently there is no PAE  
standard applicable for drones

## *Plant Protection Products*

- dosage
- volume
- coverage
- efficacy
- Amendments of approvals
- GEP

## *Law*

COM's position-→aerial spraying→banned;  
except special cases

### Ministerial decree 44/2005

- fine tuning of the existing general rules  
*eg. no need for the restriction for place of take-off,  
no need for separate flight observer*
- educational requirements -agricultural drone pilot
- Minimal technical requirements for drones  
*e.g malfunction cases; pauses; open and close of  
nozzles automatically and by the operator*

## *Video*

## *Summary*

- Conditions of the aerial spraying can't be applied literally for drones
- Currently there is no available PAE (pesticide application equipment) standards for the drones
- No pesticide use authorized for drones
